Purpose

- The purpose of this presentation is to:
 - Walk you through the current funding formula step-by-step;
 - Look at a number of illustrative examples of how the funding formula is applied to different communities; and
 - Seek your feedback on ways to improve the funding formula.

The Current RLEMP Funding Formula

RLEMP Operational Funding is calculated using the following:

1. The number and complexity of active instruments registered in the Indian Lands Registry System (e.g. permits and leases)
2. The population and land base of the First Nation
3. The level of authority that the First Nation has taken on:
 - o Training and Development – 80% base funding
 - o Operational – 100% base funding
 - o Additional funding for 53/60 First Nations
4. Funding for compliance and administration costs

There is a cap for funding at each level of authority:

- Training & Development: \$350,000
- Operational: \$375,000
- Delegated Authority: \$400,000

21	Total: Land and Natural Resource Activity Funding (C)				0,00 \$

STEP 1: Enter all the new and active transactions listed in the ILRS for the calendar year.

These are then multiplied by the rate (based on the complexity and time taken to complete each task)

Add these all together to get your sub-total Activity Funding

Adjustments for level of responsibility

E	Total Funding per Level of Responsibility (as identified in Section B)	Rate x Total	Total \$
32	Training & Development	80% x (C + D)	0,00 \$
33	Operational Level	(C + D)	0,00 \$
34	Delegated Authority	15% x (C + D) + (C + D)	0,00 \$
35	Add., Land Use Plan	5% x line 33 or 34	0,00 \$
36	Add., Environmental Management System	5% x line 33 or 34	0,00 \$
37	Add., Compliance Framework	5% x line 33 or 34	0,00 \$
38	SubTotal, Operational Or Delegated Authority		0,00 \$
39	Total: Level of Responsibility Funding (E)		0,00 \$

Step 4: Based on level of responsibility (pick one), multiply your funding sub-totals by rate (e.g. 80%, 100% or 115%)

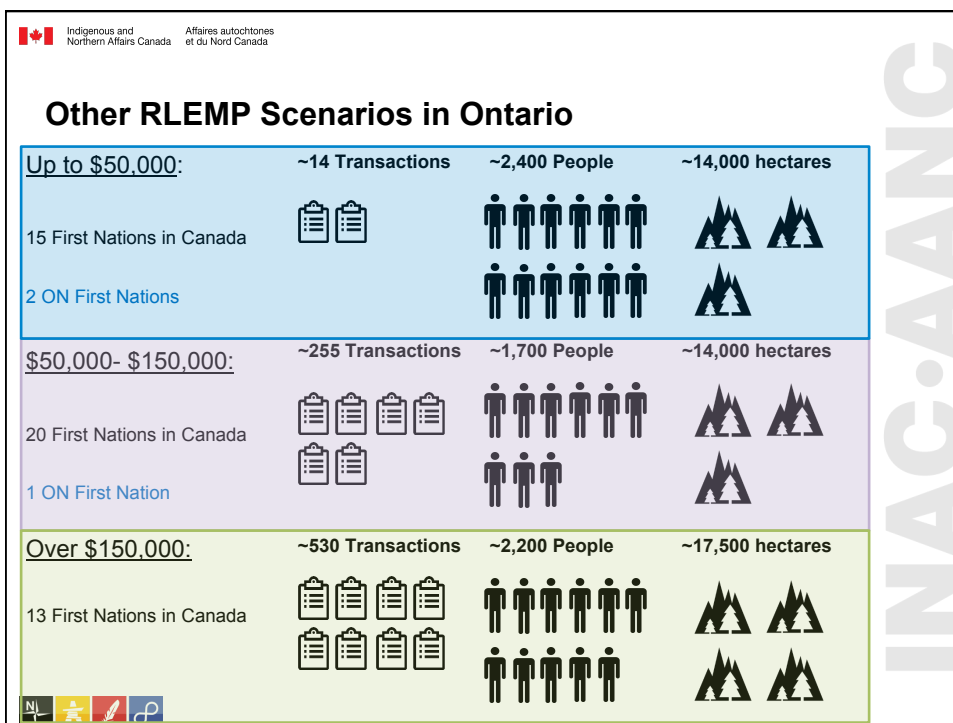

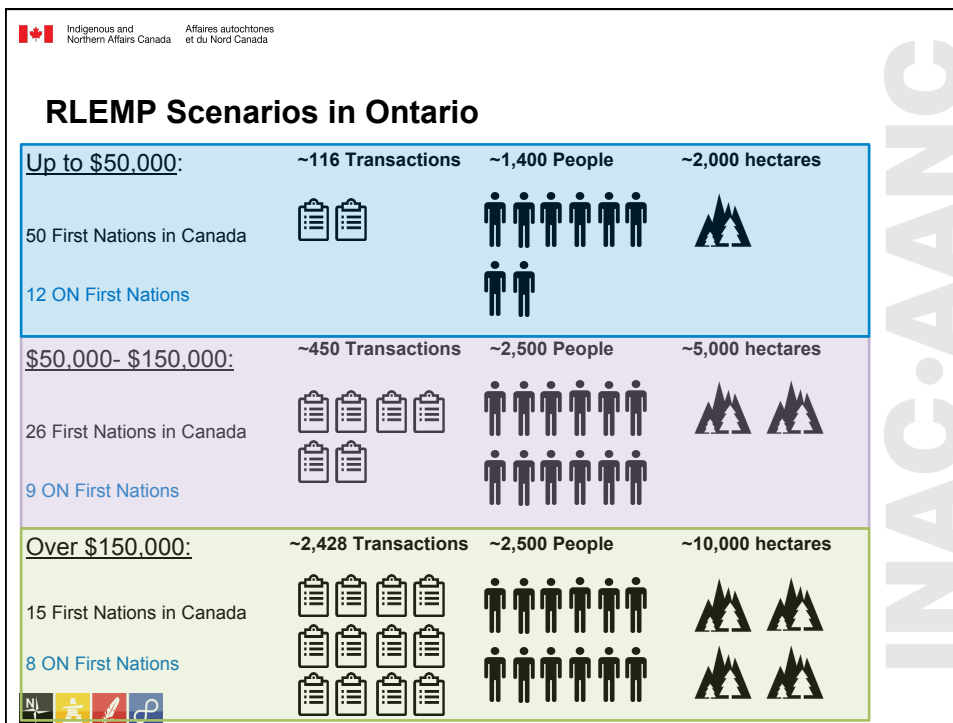

Step 5: Add Extra funding for the implementation of completed plans and sub-total again.

Almost there, one step left!

F	Funding Adjustments	Total \$
40	--	
41	Ongoing Operational Costs	4 869,00 \$
42	--	
43	Total: Funding Adjustments (F)	0,00 \$

Step 6: Add an additional \$4,869 for on-going operational costs

Step 7: Add it all up

What we have heard so far...

- There is disparity in the funding provided to First Nations – some get very little and others receive a lot.
- The funding formula is inefficient to administer and difficult to explain
- Some First Nations do not receive enough funding to cover the costs of staff or supporting a land management office
- Some First Nations receive more than they would under FNLM
- Other land management activities that are not tied to transactions should be considered as part of the funding
- It is unclear what funding is available for environment under the current formula

- What parts of the current funding formula would you keep the same? Why?
- What parts of the current funding formula would you change? How?
- What are the top 5 things that an improved funding formula should take into consideration to meet the needs of your community?
